How NELFT took its fire risk assessments online

CLIENT
NELFT NHS Foundation Trust

SECTOR
NHS — community & mental health

USING BORIS FOR
FRAs throughout the estate

The challenge

NELFT provides integrated community and mental health services across north east London, Essex, and Kent & Medway. Under the Regulatory Reform (Fire Safety) Order 2005, its premises need suitable and sufficient fire risk assessments that are kept under review — a significant job to carry out, write up and review across the estate.

The solution

NELFT's Fire Safety Manager, Frankie Faria, moved the trust's FRAs onto the BORIS online platform, which is now used throughout NELFT's estate. Assessments are carried out and recorded in one system, reports are produced from the platform, and reviews sit in the same place — backed by ongoing support from the BORIS team.

> *I'm so pleased with your continuous support (and that of others at BORIS), and even more pleased that I took on the BORIS online platform for carrying out NELFT's FRAs. Not only are the reports looking far more professional, but the whole process of carrying out and reviewing them can only get better — which will help us meet the provisions of the FSO more confidently and work far more efficiently and smarter.*

The result

- Far more professional FRA reports
- A better process for carrying out and reviewing
- More confidence meeting the Fire Safety Order
- Working more efficiently — and smarter
